

Details to Know

When evaluating your purchasing options you should always inspect the underside of the table top, where others may skimp you will find the advantages of Three Palms furniture particularly evident. When you compare the underside of the tables take note of the high number of cross members all firmly held in position with stainless steel screws. We use up to four screws per board for multi-screwed stabilisation and a flat stable surface.

- Tables not held together with screws and bolts so nothing can work loose.
- All joinery marine glued mortise & tenon.
- Table tops glued to the base for added strength.
- Heavy proportioned timbers.
- Ten year structural guarantee.
